

SuggaPlay Master Design Bible

Version 1.0

Use this document as the primary design and implementation reference for Cursor throughout the entire project.

Chapter 1: Introduction

This document is the authoritative design and engineering reference for SuggaPlay. Every screen, component and interaction should follow these standards.

Chapter 2: Brand DNA

Editorial. Premium. Fashion-led. Minimal. Confident. Contemporary. Every decision should reinforce those qualities.

Chapter 3: Creative References

Luxury magazines, gallery catalogues, fashion campaigns, museum exhibition websites, Swiss typography and minimalist portfolio sites.

Chapter 4: Design Principles

- Editorial before application.
- Photography before interface.
- Typography before decoration.
- Whitespace is an active design element.
- Reduce until nothing unnecessary remains.

Chapter 5: Colour System

- Primary Black #000000
- Primary White #FFFFFF
- Neutral Greys only
- Single Accent Red #FF2747
- Never introduce additional brand colours without approval.

Chapter 6: Typography

- Display: Geist / Inter / Suisse style grotesk.
- H1 72–120px desktop.
- H2 48–64px.
- Body 16–18px.
- Small labels 11–12px uppercase.

Chapter 7: Grid

12-column desktop grid. 8-column tablet. 4-column mobile. Consistent outer margins and vertical rhythm.

Chapter 8: Spacing

Base spacing token scale: 4,8,12,16,24,32,48,64,96,128.

Chapter 9: Photography

Large monochrome imagery. Tight crops. Full-bleed where appropriate. Images should carry emotion and visual hierarchy.

Chapter 10: Motion

Framer Motion only. Motion should communicate hierarchy. Duration 180–500ms. Ease-out. No bouncing.

Chapter 11: Components

Every UI element must be reusable. Build with shadcn/ui where appropriate but customise visually.

Chapter 12: Buttons

Flat. Minimal radius. Strong typography. Distinct hover/focus/disabled states.

Chapter 13: Forms

Simple labels. Clear validation. Minimal decoration.

Chapter 14: Navigation

Sparse. Quiet. Never visually dominate content.

Chapter 15: Landing Page

Large statement typography, cinematic imagery, clear CTA, scrolling narrative.

Chapter 16: Authentication

Elegant onboarding. Progressive disclosure. Minimal friction.

Chapter 17: Profiles

Editorial hero image. Magazine-inspired layout. Metadata secondary.

Chapter 18: Discovery Feed

Immersive visual browsing. Card density should remain low.

Chapter 19: Messaging

Quiet interface. Focus on conversation. Token actions clearly separated.

Chapter 20: Token Economy

Premium purchase experience. Stripe checkout should feel luxurious rather than transactional.

Chapter 21: Accessibility

WCAG AA. Semantic HTML. Keyboard navigation. Visible focus states.

Chapter 22: Responsive

Mobile-first. Maintain editorial hierarchy at every breakpoint.

Chapter 23: Performance

Optimise images. Lazy load. Server Components by default. Minimise client bundles.

Chapter 24: Code Architecture

- App Router.
- TypeScript everywhere.
- Reusable components.
- Feature-first organisation.
- No duplicated UI.

Chapter 25: Cursor Rules

- Never generate generic Tailwind examples.
- Prefer bespoke layouts.
- Follow this document over defaults.
- Keep styling token-driven.
- Never introduce inconsistent spacing.
- Never invent colours.
- Maintain visual consistency.

Chapter 26: Definition of Done

- Responsive.
- Accessible.
- Reusable.
- Matches design system.
- Passes lint and typecheck.
- Ready for Vercel deployment.
